PERSONAL PROFILE

I am a graduate of Politeknik Negeri Padang D4 Software Engineering technology graduate with a GPA of 3.96, specializing in fullstack web development and machine learning. Experienced in building end-to-end web applications using Laravel, Nuxt.js, and Vue.js, with hands-on exposure to geospatial systems, REST API development, and PostgreSQL database management. Familiar with modern tools and technologies including Docker, Redis, Elasticsearch, and GitLab. A collaborative team player with real-world work experience as a Fullstack Developer, with a strong interest in software engineering and intelligent systems.

EDUCATION

Padang State Polytechnic - Padang, West Sumatra, Indonesia **2024 - 2026**

D4 Software Engineering Technology - GPA 3.96

- Studied software engineering with a focus on intelligent systems and data-driven applications
- Relevant Courses: Machine Learning, Artificial Intelligence, Database Systems, Data Warehouse & Business Intelligence, Software Testing & Quality Assurance, Service-Based Architecture, and Software Construction & Evolution.
- Trained and implemented various machine learning models including Naive Bayes, CNN, and Random Forest as part of academic projects.
- Gained hands-on experience with Docker, automation testing, Redis, Elasticsearch, and NoSQL databases such as MariaDB during coursework and practical assignments.
- **Final Project:** Implementation Of Convolutional Neural Network (CNN) And Random Forest Algorithms To Predict Dry Eye In Smartphone Users Based On Image Data And Eye Structure Collected Via A Website

Padang State Polytechnic - Padang, West Sumatra, Indonesia **2021 - 2024**

D3 Informatics Management - GPA 3.90

- Learn programming languages and design a web or mobile-based project.
- Participate in course & certification program activities, and work on several programming projects during lectures
- Relevant Courses: Programming Algorithms, Web Programming, Laravel Web Programming, Database Systems, Object Oriented Programming, and Software Engineering
- **Final Project:** Design of Inventory Information System and Pet Services at R4 Petshop & Clinic Using Nuxt Js Framework and Rest API Laravel

TRAINING AND CERTIFICATION

- | | |
|---|------------------------|
| • Pijak Flash Class x Dicoding Machine Learning | Apr - Jul 2026 |
| • Botcamp ID Camp x Dicoding Multi-App Platform | Okt 2025 - Jan 2026 |
| • Botcamp ID Camp x Dicoding Frontend Web Developer | Sept 2024 - March 2025 |
| • Best Graduate Award Charter of Padang State Polytechnic | Sept 2024 |
| • PT Asli Isoae Solusine Internship Award Charter | Jun 2024 |
| • Student Executive Board Award Charter | Des 2023 |
| • Oracle Cloud Infrastructure Foundations Award Charter | Jun 2023 |

TRAINING AND CERTIFICATION

• Database Programming With PL/SQL Award Charter	Jan 2023
• Database Programming With SQL Award Charter	Nov 2022
• VSGA Junior Web Developer Award Charter	Okt 2022

WORK EXPERIENCE

PT. Traspac Makmur Sejahtera	Apr 2025 - Present
------------------------------	--------------------

Fullstack Developer

- Developed web applications by building REST APIs as backend services and implementing frontend UI based on Figma designs with state management for API integration
- Managed PostgreSQL database including table management, triggers, Views, and Materialized Views to improve data retrieval efficiency
- Integrated geospatial features on the frontend including GeoServer, Leaflet.js, and draw map functionality for location-based data display
- Tested and validated APIs using Postman to ensure backend and mobile application connectivity including handling backend logic for mobile application services
- Handled staging server deployment via SSH, including application updates and port configuration for installed services
- Collaborated with the development team using SVN and GitLab for version control and source code management

RSI Yarsi Ibnu Sina Padang Panjang	Nov 2024 - Mar 2025
------------------------------------	---------------------

IT Software Engineer

- Design and maintain the hospital pillar information system
- Ensure the smooth operation of the hospital management system
- Perform troubleshooting and optimization of BPJS Health API
- Develop system development solutions using Laravel and CodeIgniter (CI) frameworks to improve operational efficiency and system performance
- Handle hardware maintenance such as routers, hubs, printers, and various other hardware to support hospital technology needs

PT. Asli Isoae Solusine	Feb - Jun 2024
-------------------------	----------------

Intership Web Developer

- Designed the e-ticketing information system project at PT CLI.
- Actively involved in teamwork on designing web development system flow
- Actively involved in teamwork in designing databases in web development.
- Designing system functionality and API routes using the laravel framework as a backend
- Designing the website development interface using the Nuxt js framework as a frontend

ORGANIZATION EXPERIENCE

Student Executive Board - Padang State Polytechnic	Mar - Des 2023
--	----------------

Communication and Research Development Staff

- Actively involved in Student Executive Board activities as staff and contribute to the implementation of Student Executive Board programs.
- Planning and implementing various internal and external campus activities
- Become the Chief Executive and Coordinator of the committee responsible for the implementation of activities.

SKILL

Hard skill

- Proficient Laravel, Nuxt Js Frameworks, and Flutter Framework
- Proficient HTML, CSS, TailwindCSS, Bootstrap, PHP, JavaScript, vue js programming languages, and dart
- Able to use Postman in Rest API testing
- Able to store and manage databases using PostgreSQL and MySQL
- Able to manage project design github, Tortoise SVN, and Gitlab
- Able to create a system design flow using balsamiq and figma
- Able to Master Ms Office such as Microsoft Word, Excel, and Power point
- Proficient the use of Adobe Photoshop, Adobe Premier, and Canva editing applications

Soft skill

- Good communication skills
- Ability to work in a team or individually
- Have good time management
- Honest and responsible
